06 ABOUT MONTANA ROCKWORKS

08 MCGREGOR LAKE

McGregor Lake tones consist of cool greys, warm tans and golden browns accented by unique dendrites.

12 MOOSE MOUNTAIN

Moose Mountain colors contain smoky greys, tans and chocolate tones with lineal profiles.

16 CASTLE ROCK

Chocolate browns and tans with grey cores distinguish Castle Rock from other stones.

20 MONTANA ANTIQUE

Dark brown and brilliant reds with blueish grey interiors mark the color pallet of Montana Antique.

22 TUMBLED STONE

Muted tones and soft edges with greys, browns, tans and golds are distinctive of this Tumbled Stone.

24 HIGHLANDS

Highlands is a warm blend of natural, seam and split faces with rich color running throughout.

38

26 MUSSEL SHELL

Smooth edges and subtle shades make Mussel Shell River a beautiful compliment to your project.

28 SPLIT FACE

The rich texture and neutral tones with varying shades of grey make Split Face stone an excellent foundation for any color pallet.

30 BANNACK

Varying shades of grey, soft edges with a smooth hand make Bannack a peerless, artistic stone, great for the trending modernest design.

32 COTTAGE BLEND

The Cottage Blend series creates a rustic, organic look by combining a blend of natural linear and mosaic shapes.

34 STACKED STONE

The Stacked Stone series is a low profile stone presented with split and natural faces.

36 ASHLAR

Add a contemporary and unique flare to any home with this Ashlar stone.

30

40 AUTUMN FLAME

Autumn Flame is a narrow linear stone consisting of greys, dark reds, browns and copper tones.

42 AUTUMN GOLD

Autumn Gold is square and rectangular in orientation. Gold, tans, and earthy tones prevail.

44 ECHO VALLEY

Echo Valley is a striated stone with long lineal lines. This stone is predominantly grey with subtle brown and beige tones throughout.

46 KINTLA BLEND

Kintla is an exquisite combination of greys, tans, browns and golds with pops of rust tones throughout

48 CHIEF CLIFF BLEND

Chief Cliff is a beautiful blend of cool greys, chocolate browns and warm tans.

50 LANDSCAPE STONE

Our various sizes of steps, drystack, random and ledge will easily compliment any landscape design.

BANNACK LEDGE THIN VENEER

About Montana Rockworks

Owners Brad Mercord and Bill Carter founded Montana Rockworks over two decades ago. When Brad's thriving landscaping firm outpaced production capabilities at the local quarry in the middle of an upscale project, Brad and Bill bought the local quarry, quickly up-

graded it and got the job done. Brad and Bill quickly went on to be awarded as "Entrepreneurs of the Year" by the Montana SBA, in 2000, for their phenomenal success in the stone industry. From there Montana Rockworks quickly grew from meeting local demands for superior stone, to meeting international requests for a variety of projects. With the introduction of thin veneer stone in 2006, Montana Rockworks moved on to become a leader in the natural stone thin veneer industry. Today, Rockworks is continuing to revolutionize, elevate and expand the landscape, architectural and thin veneer stone industry.

As you scan through the pages of this brochure, we want you to be inspired. The exquisite beauty of natural stone can be added to any project, large or small, to create a unique touch of color, texture and style. Let your imagination run wild with the dream of bringing Montana to your home.

McGREGOR LAKE LEDGE THIN VENEER

McGregor Lake Quarry

Perched high, in the forest of Northwest Montana, the McGregor Lake quarry overlooks its namesake. McGregor Lake is a prized variety of the popular Chief Cliff argillite. Quarried from a cliff formation, the stone from this quarry is visually stunning; predominately light gray in color, with strong gold, bronze and tan tones. The dendrite fern patterning creates the striking look of natural, individual artwork. With the warmth of a Big Sky Country sunset and naturally recta-lineal shaping, McGregor Lake is unparalleled in versatility.

MOOSE MOUNTAIN

MOOSE MOUNTAIN LEDGE THIN VENEER

Moose Mountain Quarry

Stone from the Moose Mountain quarry elicits constant compliments. The colors are grounded in a dark, smoky gray, chocolate brown and tans that blend together for a remarkable material. Stone from Moose Mountain marries the colors from the nearby Castle Rock and McGregor Lake quarries, which make it an excellent choice to blend with our most popular Chief Cliff stones. The inspiration of this Montana, mountain ridge quarry, can be seen in every stone.

CASTLE ROCK

CASTLE ROCK LEDGE

Castle Rock Quarry

Castle Rock is a high alpine quarry perched on a ridge line, with birds-eye views of two different valleys. The core of the stone is light gray, with surface coloring ranging from light tan to dark chocolate brown. Castle Rock is hand and machine picked from talus slopes; the dark, common, patina is from centuries of exposure to the elements. When "Chief Cliff" is mentioned, most visualize the dramatic coloring found in this quarry.
